1.1.6 Bids from Joint Ventures, Consortium or Associations so long as they are formed and registered prior to the bid submission date.

1.1.7 The bidders who have been temporarily suspended or removed from the list of registered suppliers by the purchaser or banned from Ministry/country wide procurement shall be ineligible for participation in the bidding process.

1.2 Cost of Bidding

1.2.1 The Bidder shall bear all costs associated with the preparation and submission of its bid, and "the Purchaser", will in no case be responsible or liable for these costs, regardless of the conduct or outcome of the bidding process.

In case of any transgression of this code, the bidder is not only liable to be removed from the list of registered suppliers, but it would be liable for other punitive actions such as cancellation of contracts, banning and blacklisting or action in Competition Commission of India, and so on.

1.3.2 Code of integrity for Public Procurement: The Purchaser as well as bidders, suppliers, contractors and consultants should observe the highest standard of ethics and should not indulge in the following prohibited practices, either directly or indirectly, at any stage during the procurement process or during execution of resultant contracts:

ii) **"Fraudulent practice"**: any omission or misrepresentation that may mislead or attempt to mislead so that financial or other benefits may be obtained or an obligation avoided. This includes making false declaration or providing false information for participation in a tender process or to secure a contract or in execution of the contract;

iii) **"anti-competitive practice"**: any collusion, bid rigging or anti-competitive arrangement, or any other practice coming under the purview of the Competition Act, 2002, between two or more bidders, with or without the knowledge of the purchaser, that may impair the transparency, fairness and the progress of the procurement process or to establish bid prices at artificial, non-competitive levels;

Specification of Fabrication of Oil Agglomeration unit

Preamble:

Washing of coal is done by oil agglomeration process. Coal samples is wet grinded in vibratory cup mill for different durations of time with addition of water. The pasty solid thus obtained is diluted with water to make the coal slurry and the slurry is taken forward for oil agglomeration experiments. Subsequently, the coal slurry is added into the oil-water emulsion and the resultant mixture is agitated for specific period of time with variable speed for efficient coating of oil droplets on coal particles. Upon completion of mixing time, the agglomerated clean coal is transferred to a container with additional water. The agglomerated clean coal, being lighter, typically floats to the top of beaker, which is either scrapped from the top or sieved through different mesh strainer, leaving behind the mineral matter suspended in the aqueous layer. The clean coal is further washed with water.
